

## SureService® Right Start Startup and Commissioning

Ensure a trouble-free gas analyzer startup with our standard SureService Right Start Startup and Commissioning module. A typical startup and commissioning service call consists of the following procedures:

- Verify point-to-point wiring of major components
- Verify point-to-point process tubing connections
- Verify that vent lines are installed properly (if applicable)
- Set pressure regulators
- Verify software
- Verify any site-specific parameters
- Check voltages for proper reading
- Make calibration and repeatability checks using calibration gas
- Apply stream gas and verify proper analysis
- Make any needed adjustments
- Provide informal technician and operator training
- Provide customer with copies of updated configuration reports and onsite checklist

The Standard SureService Right Start Startup and Commissioning module can be customized to fit your specific needs. Custom Startup and Commissioning Service agreements are available at negotiated rates. Contact your Rosemount Analytical sales representative or our Customer Service Center at 800-433-6076 for additional information.

### Pre-startup Site Preparation

Customers can significantly reduce the time required for startup and commissioning of a gas analyzer by completing several simple tasks before having a field service technician arrive onsite. Prior to startup, customers should complete the following:

- Ensure all major system components are available
- Secure and install the gas analyzer
- Connect all wiring with proper voltages and supply

power to the gas analyzer and accessories (leave all units de-energized until startup)

- Ensure that all required gases are available—including calibration and stream gas—and that they are piped and plumbed
- Ensure line is pressurized and under flowing conditions
- Ensure that required site personnel are available

### Pricing

Right Start Startup and commissioning service  
Package price per analyzer \$780 (plus travel time travel and living expenses)

### Terms

Does not include travel time and living expenses, which are billed as incurred. Please review our complete terms and conditions for information on additional services. The quoted price above includes for one day or less onsite which can be used for startup, commissioning, and training on an individual analyzer. Service for additional equipment will require a quote for additional charges. Delays in installation may result in other charges at the onsite demand service rates. Please allow a two-week notice prior to startup. Additional costs may be applied if less than two-week notice is given. It is recommended that the pre-startup preparation tasks are completed prior to the service technician's arrival to avoid any standby charges. Rosemount Analytical does not guarantee that the startup will be charged at list prices if it is determined that the customer has special needs outside of normal start up functions and commissioning. (Please consult factory for SureService list prices on the other service modules and additional terms and conditions information.)
